JFMDA: Japan Federation of Medical Devices Associations

	Instrument or Equipment name(Examples)
1	Lead in the piezoelectric materials(single crystals) for probes and endoscope: Pb(PMN-PTand so on) (e.g. Diagnostic ultrasound systems and diagnostic, surgical and treatment equipment. Probes and endoscope used in ultrasonic diagnostic equipment, ultrasonic surgical system and ultrasonic lithotripter.)
2	Tin-lead eutectic solder for interconnection with piezoelectric materials for transducers and interconnection with (ultra thin) cables for sygnal of transducers (e.g. Diagnostic ultrasound systems and diagnostic, surgical and treatment equipment. Probes and endoscope used in ultrasonic diagnostic equipment, ultrasonic surgical system and ultrasonic lithotripter.)
